

Shona Ross B.Sc (Hons) MRQA

Quality Assurance Associate

Shona graduated from the University of Strathclyde with an honours degree in Forensic and Analytical Chemistry.

Her first job after graduating in 2004 was working in the Bioanalysis Department of Quintiles. Transitioning through to Aptuit within bioanalysis, she progressed to Senior Scientist with responsibilities as Study Director and Responsible Scientist for clinical and preclinical bioanalytical studies. During her time with the company, she completed secondments in both Kansas and Verona, transitioning studies and working to align department practices.

At the closure of the Aptuit site, Shona returned to Quintiles in the Immunology PCR labs as a Medical Technologist working on high throughput, large, clinical GCP studies.

In 2012, she moved to Hyaltech in a regulatory affairs capacity reviewing documents for medical device design dossiers and technical files.

Following this, Shona took up a role in Novartis Animal Health (now Elanco) Global Analytical Services division to set up and lead a data review team. The team is responsible for review of all data and documentation relating to post-market stability studies and validation and remediation of product release testing methods in line with GMP and staff training in data integrity and consistency.

Shona joined TMQA as a Quality Assurance Associate in May 2015.
